

# Call for Papers

JoMMID invites submissions of high-quality original research, reviews, and other scholarly work related to all aspects of medical microbiology and infectious diseases.

## Scope:

We welcome submissions on a wide range of topics, including but not limited to:

- **Bacterial Infections:** Pathogenesis, diagnosis, treatment, and prevention of bacterial infections, including antimicrobial resistance.
- **Viral Infections:** Epidemiology, molecular biology, antiviral therapies, and vaccine development for viral infections.
- **Fungal Infections:** Clinical manifestations, diagnosis, and management of fungal infections, including emerging fungal pathogens.
- **Parasitic Infections:** Epidemiology, life cycle, pathogenesis, and control of parasitic infections.
- **Emerging Infectious Diseases:** Surveillance, detection, and characterization of novel and re-emerging infectious diseases.
- **Clinical Microbiology:** Laboratory diagnosis of infectious diseases, including molecular diagnostics and antimicrobial susceptibility testing.
- **Immunology of Infectious Diseases:** Host-pathogen interactions, immune responses to infection, and immunomodulatory therapies.
- **Infectious Disease Epidemiology:** Surveillance, outbreak investigation, and mathematical modeling of infectious diseases.
- **Global Health and Infectious Diseases:** Impact of infectious diseases on global health, including travel medicine and neglected tropical diseases.
- **One Health:** Interdisciplinary approaches to understanding and addressing the interconnectedness of human, animal, and environmental health in relation to infectious diseases.
- **Antimicrobial Stewardship:** Strategies to optimize the use of antimicrobial agents and prevent the emergence of antimicrobial resistance.

- **Infection Prevention and Control:** Measures to prevent and control healthcare-associated infections and community-acquired infections.
- **Vaccines and Immunization:** Development, efficacy, and safety of vaccines for infectious diseases.
- **Infectious Diseases in Special Populations:** Focus on infectious diseases in specific populations such as pregnant women, children, the elderly, and immunocompromised individuals.

### **Manuscript Types:**

We accept the following types of manuscripts:

- **Original/ Research Articles:** Reports of original research findings with clear scientific rationale, methodology, results, and conclusions.
- **Review Articles:** Comprehensive overviews of specific topics in medical microbiology and infectious diseases, including full reviews, mini-reviews, systematic reviews and meta-analyses.
- **Short Communications/reports:** Brief reports of significant findings that do not warrant a full-length research article.
- **Case Reports:** Detailed descriptions of interesting or unusual clinical cases with educational value.
- **Clinical Trial Reports:** Reports of findings from clinical trials related to infectious diseases.
- **Editorials:** Opinion pieces on current topics of interest in the field.
- **Letters to the Editor:** Comments or critiques on previously published articles.
- **Commentaries:** A short, opinion-based article that provides analysis or perspective on a contemporary issue or a recently published article within the journal.

### **Submission Guidelines:**

Authors are requested to carefully review the journal's **Instructions for Authors** before submitting their manuscripts. Manuscripts should be submitted online through the journal's submission portal.

**In the event of any issues with the online submission system, authors may alternatively submit their manuscripts via email to [jommid@gmail.com](mailto:jommid@gmail.com).**

**Open Access Policy:**

JoMMID is an open access journal, which means that all articles are freely available online to readers worldwide, immediately upon publication.

**Peer Review Process:**

All submitted manuscripts undergo a rigorous double-blind peer review process to ensure the quality and validity of published research.

**We encourage researchers from all over the world to submit their valuable contributions to JoMMID.**

**Contact Information:**

For any inquiries regarding manuscript submissions or the journal, please contact the editorial office at [jommid@gmail.com](mailto:jommid@gmail.com).

**Submit your manuscript today and contribute to the advancement of knowledge in medical microbiology and infectious diseases!**
